EDUCATION

CareerFoundry | Full-Stack Web Development Certification   Apr 2022-Sept 2022

- Developed six full web apps from scratch with feedback from industry professionals, including:
  - Single-page web app built with React and Bootstrap
  - MongoDB database and Express API for use with two frontend projects
  - Progressive web app that uses Google OAuth2 for authentication
  - Native real-time mobile chat app written in React Native
- Learned and utilized common development practices like Agile, TDD, and Kanban boards

Cornell University | BA in Italian Studies   Aug 2014-Dec 2018

- Accolades: 3.91 GPA, Dean's List 4/4 years
- Non-major studies: Computer Science, Sound Design, Physics of Musical Sound, Philosophy

EMPLOYMENT HISTORY

Fleet Service Agent | American Airlines | Boston, MA   Nov 2021-present

- Push back several $130 million aircraft every day, after becoming one of handful of employees to complete pushback training in their first 100 days of employment
- Carry hundreds of bags weighing up to 75 lbs each day, keeping pace with stronger male colleagues

Archival Assistant | Jean Locey, Professional Photographer & Cornell Professor   Jan 2019-Dec 2021

- Planned and executed digitization of Prof. Locey's lifelong collection of over 250 individual images of professional film photography work, to be archived, printed, and/or uploaded to her website
- Edited each of the 250 digital images, using Photoshop to manually adjust contrast and color balance to accurately match original finished works, to Prof. Locey's specifications

DEVELOPMENT EXPERIENCE

ArtCenter Game Jam | San Francisco, CA (Remote)   Jan 2021-Mar 2021

- Collaborated with small team to design, develop, and deploy a game in 72 hours
- Produced original music carefully written to match the technical requirements and tone of the game
